WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

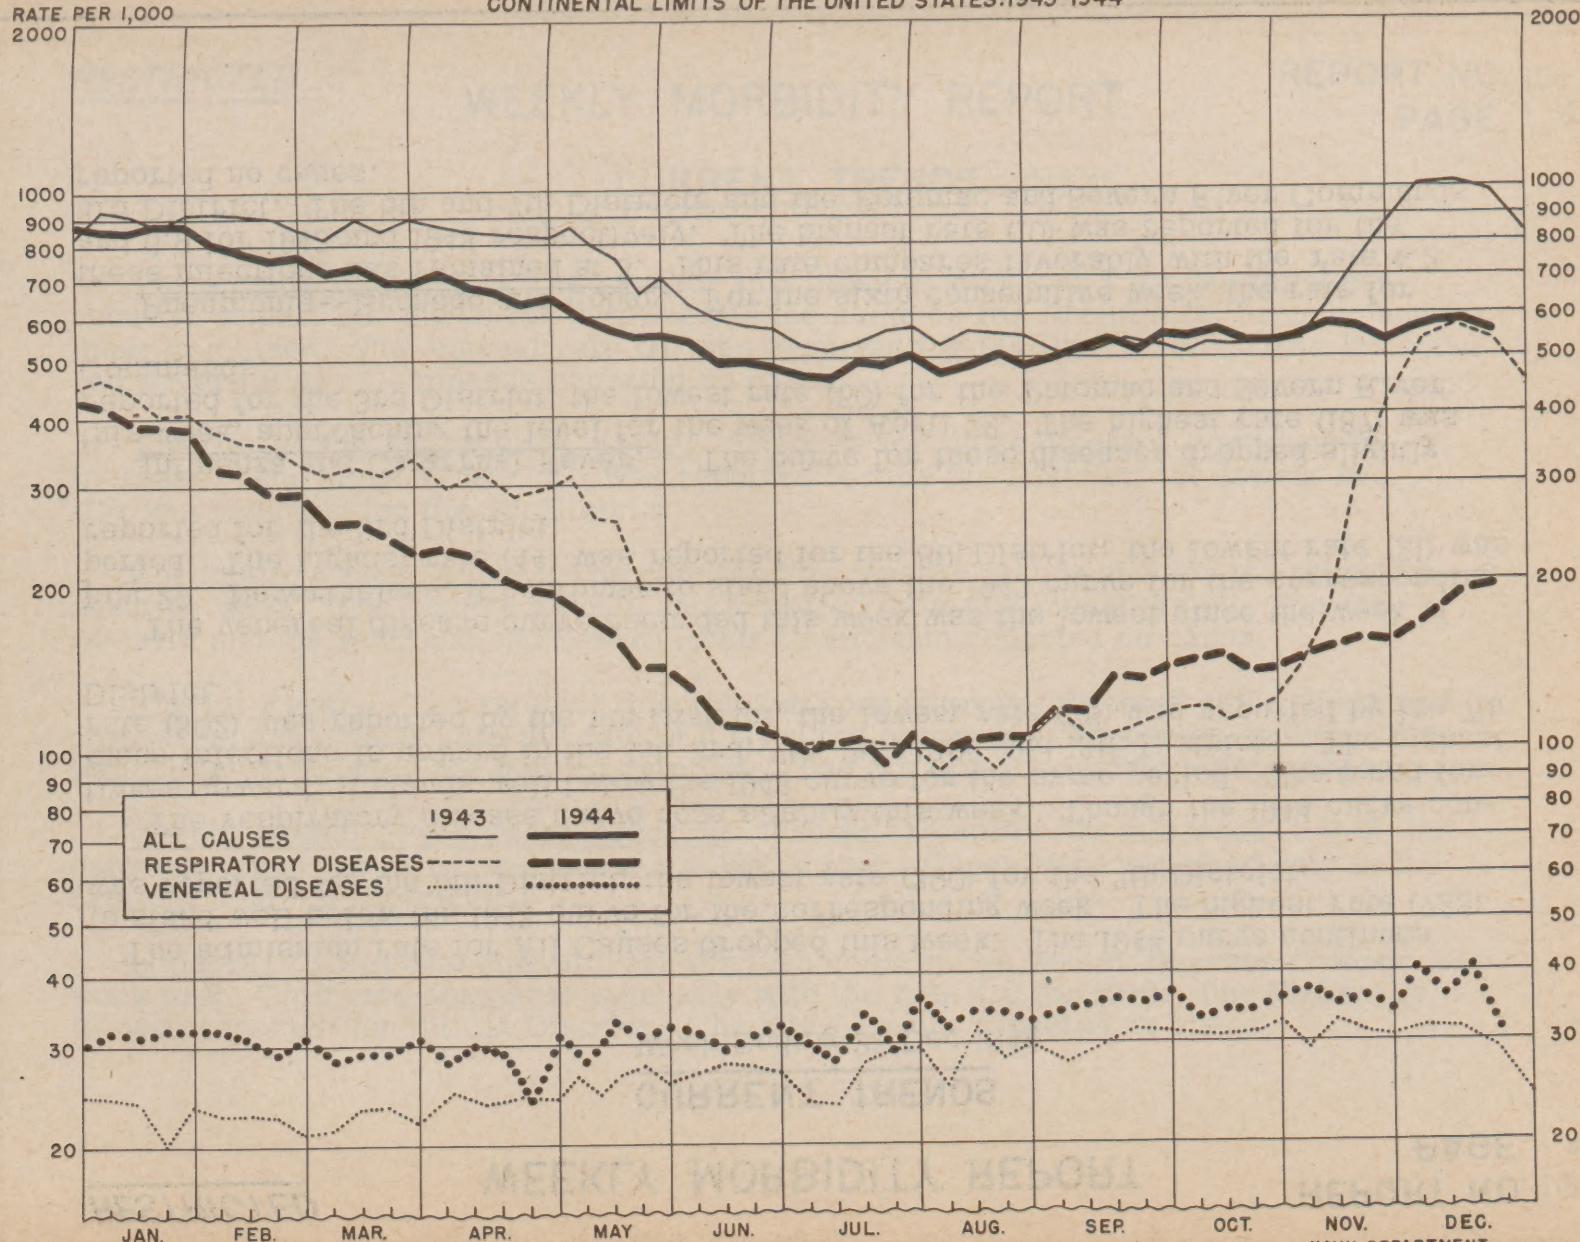

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

FIGURE 1
ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES*, VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1943-1944

REPORT NO. 156
PAGE 2

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY)

CURRENT TRENDS

Week Ending 23 Dec 1944

The admission rate for All Causes dropped this week. The 1944 curve continues to stand well below the 1943 curve for the corresponding week. The highest rate (723) was reported for the 5th District, the lowest rate (390) for the 7th District.

The respiratory disease curve rose slightly this week. Though the 1944 curve continues upward, it stands well below the 1943 curve for the same period. The trend for these infections is upward in the 1st, 3rd, 7th, 9th, 12th, and 13th Districts. The highest rate (302) was reported by the 5th District, the lowest rate (76) was reported by the 7th District.

The venereal disease curve recorded this week was the lowest since the week of July 29. Nevertheless, it continues to stand above the 1943 curve for the corresponding period. The highest rate (44) was reported for the 8th District, the lowest rate (21) was reported for the 3rd District.

Influenza and Catarrhal Fever. The curve for these diseases dropped slightly this week, approaching the level for the week of April 22. The highest rate (187) was reported for the 3rd District, the lowest rate (50) for the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. For the sixth consecutive week, the rate for these infections has remained at 3. This rate compares favorably with the rate 4.2 and 6.9 for 1942 and 1943 respectively. The highest rate (10) was reported for the 3rd District. The 6th and 7th Districts and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS CONTD.

Pneumonia, Atypical. The rate for this disease stands at 3 for the third consecutive week. The curve for this week is the same as for Pneumonia, broncho and lobar combined. The highest rate (11) was reported for the 11th District. The Potomac and Severn River Commands reported no cases.

Tonsillitis and Pharyngitis, Acute. The rate for these diseases continues to increase. The highest rate (131) was reported for the 5th District, the lowest rate (15) was reported for the 7th District.

Rheumatic Fever, Acute. The rate for this disease stands at 2 for the third consecutive week. The highest rate (11) was reported from the 13th District. The 6th District and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. The rate for this disease rose sharply this week to 10. This rate compares unfavorably with the rate of 6.4 for the corresponding period of 1943. The 13th District reported the highest rate (38). The 6th and 7th Districts reported no cases.

Cerebrospinal Fever, Meningococcic. Though the rate rose this week to 0.16, the curve continues to stand well below the 1943 curve. Cases were reported only in the 3rd, 5th, and 9th Districts.

Malaria. After standing at 3 for thirteen consecutive weeks, the rate dropped this week to 2. This rate compares favorably with the rate 4.0 for 1943. The highest rate (6) was reported for the 1st District. The 13th District reported no cases.

RESTRICTED

WEEKLY MORBIDITY REPORT

REPORT NO. 156
PAGE 5

CURRENT TRENDS CONTD.

Measles. The rate for this disease rose this week to 5. This rate compares favorably with the rate 7.8 for 1942 and the rate 8.3 for 1943. The highest rate (9) was reported for the 3rd and 5th Districts. The 4th and 6th Districts reported no cases.

Poliomyelitis, Anterior, Acute. Three (3) new cases of poliomyelitis were reported for the week by Continental Shore Stations--all from the 9th District. The cumulative total of cases occurring among Naval personnel in Continental Shore Stations since Jan. 1, 1944 is 100.*

The U. S. Public Health Service reports for the week show civilian cases in the four states with the highest incidence distributed as follows:

New York	37	Massachusetts	5
California	6	Michigan	4

*Several of these cases were not reported on Weekly Morbidity Report NavMed-172.
